• Researched and implemented AI-driven video creation techniques,
leveraging deep learning models for automated media generation.
• Developed and fine-tuned speech-to-text models using Whisper AI and
Wav2Vec2, improving transcription accuracy for diverse Indian English
accents.
• Built an OCR pipeline using Tesseract OCR and EasyOCR to digitize
handwritten scripts, converting them into structured text files.
• Deployed AI-powered transcription and OCR solutions with low-latency
inference using PyTorch and ONNX for real-time applications.
• Designed APIs to serve speech-to-text and OCR models, enabling seamless
integration into video production workflows
